SUMMARY

Software Development Engineer II (SDE-2) with 2.6+ years of experience in **High-Scale Fintech** and **Loan Management Systems (LMS)**. Specialized in **Java 17, Spring Boot, and Apache Kafka** to architect scalable **BNPL** and **Secured BNPL (LAMF)** platforms. Core expertise in **Limit Management**, repayment engines, and ledger consistency. **Architecture-focused engineer** currently **upskilling** in **System Design (HLD/LLD)** and **AWS**

PROFESSIONAL EXPERIENCE

Software Development Engineer II | M2P Fintech

Oct 2025 – Present

- **System Architecture:** Spearheaded the **High-Level Design (HLD)** and **Low-Level Design (LLD)** for event-driven microservices using **Apache Kafka**, ensuring eventual consistency and sub-second latency for high-throughput loan processing.
- **Credit Line Systems:** Architected **Revolving and Non-Revolving** credit systems; implemented **Limit Replenishment** logic handling **10k+ concurrent transactions** with zero data inconsistency.
- **Secured BNPL & LAMF Development:** Engineered **LAMF** platforms and collateral valuation logic for portfolios exceeding **INR 50Cr+**; orchestrated automated lien-marking workflows for 100% accuracy.
- **Technical Leadership:** **Mentored and Led** a cross-functional sub-team of 3 engineers; improved team velocity by **25%** through standardized code review protocols and **AI-Native workflows** (Claude Code/Gemini CLI).
- **Cloud Infrastructure (Upskilling):** Integrating **AWS Cloud Infrastructure** (VPC, EC2) best practices to support scalable, secure, and highly available fintech microservices.

Software Development Engineer I | M2P Fintech

July 2023 – Sept 2025

- **Fintech Product Engineering:** Developed a robust **Undo Repayment** module for the **BNPL lifecycle**, successfully reversing **5,000+ erroneous transactions** while maintaining 100% ledger accuracy.
- **Asynchronous Messaging:** Integrated **Apache ActiveMQ** for background task processing, reducing **API response times** by **40%** for heavy interest and schedule recomputation jobs.
- **Financial Logic:** Architected calculation modules using **PMT and Goal Seek** algorithms; implemented **MDR Charge** features processing **INR 10Mn+** in monthly transaction volume.
- **Production Ownership:** Piloted go-live projects for **4 major fintech solutions** (Volt Money, PayU), resolving **30+ critical production issues** and shortening deployment cycles by **15%**.
- **Post-Live Stability:** Spearheaded resolution of production edge cases and handled post-live deployments, resulting in a **30% reduction in post-release incidents**.
- **Mandate Management:** Engineered and maintained mandate-related functionalities for automated loan repayment processing systems.

SDE Intern | M2P Fintech

March 2023 – June 2023

- **Upskilling:** Mastered **Spring Boot** microservices and financial domain logic for loan systems.
- **Quality Assurance:** Learned to improve code reliability by implementing **JUnit** test cases.
- **DevOps:** Gained hands-on experience in **Git and GitHub** professional collaborative workflows.

TECHNICAL SKILLS

- **Backend:** Java 17, Spring Boot, REST APIs, Spring Security, AOP, JUnit, Mockito, SQL, Maven, Data Structures, Database Design, Spring Gateway, Spring Cloud.
- **Distributed Systems:** Apache Kafka, ActiveMQ, Microservices, RDBMS (MySQL), Redis, Grafana, Prometheus, Git, GitHub, Open-Id, OAuth.
- **Tools & Technologies :** AWS (VPC, EC2, RDS), System Design (HLD, LLD), Scalability, Fault Tolerance
- **Development Tooling (AI):** Claude Code, Gemini CLI, GitHub Copilot, Cursor, BMAD.

EDUCATION

University Visvesvaraya College of Engineering

Bachelor of Technology in Computer Science and Engineering

Department of Technical Education, Karnataka

Diploma in Computer Science & Engineering

B.Tech in CS & Engineering

2020 – 2023

CGPA: 9.2

2017 – 2020
