SUMMARY

Software Development Engineer II (SDE-2) with **3 years** of experience in **high-scale Fintech and Loan Management Systems (LMS)**. Specialized in **Java 17, Spring Boot, Apache Kafka, and Microservices** architecture across **BNPL, Secured BNPL (LAMF), and Payments Infrastructure**. Delivered **91% latency reduction, INR 100Cr+ transaction volumes, and 99.95% uptime**. Proven track record in **System Design (HLD/LLD), RESTful APIs, Event-Driven Architecture, AWS, and Distributed Systems**. Practices **AI-augmented development** with Claude Code, GitHub Copilot, Gemini, and ChatGPT — eliminating repetitive coding entirely and delivering **30% faster feature releases**.

PROFESSIONAL EXPERIENCE

Software Development Engineer II | M2P Fintech

Oct 2025 – Present

- Re-architected Apache Kafka event-driven pipelines, slashing transaction latency by **91% (2.1s → 180ms)** while sustaining **INR 100Cr+ per-month volume at 99.95% uptime** with zero data loss.
- Engineered rule-based credit limit controls in Java 17 and Spring Boot to handle **10k+ concurrent transactions**, mitigating **INR 5Cr+** in per-month risk exposure across 50k+ active accounts.
- Delivered collateral valuation engines for Secured BNPL (LAMF) portfolios exceeding **INR 50Cr+**; systematized lien-marking workflows via REST APIs, reducing manual effort by **70%** with 100% data accuracy.
- Led and grew a sub-team of 3 engineers via Agile and Scrum; accelerated delivery velocity by **25%** and cut PR review time from **8 hours to 2 hours**.
- Introduced end-to-end observability via Grafana/Prometheus dashboards and cross-service tracing, lowering MTTR by **40%** through early bottleneck detection across microservices.
- Adopted **AI-augmented development workflows** (Claude Code, GitHub Copilot, Gemini, ChatGPT) across the sub-team, shifting engineers to **100% AI-generated code scaffolding** and accelerating feature delivery by **30%**.

Software Development Engineer I | M2P Fintech

July 2023 – Sept 2025

- Developed a transaction reversal system spanning the full BNPL lifecycle, correcting **5,000+ repayments** while preserving **100% dual-entry ledger accuracy** and audit compliance.
- Architected a Kafka-driven asynchronous bill statement engine, offloading **2M+ per-month PDF generations** and trimming API response latency by **45%**.
- Authored MDR charge modules processing **INR 10Mn+ per month**; applied PMT and Goal Seek algorithms for 100% accurate loan amortization scheduling.
- Spearheaded go-live for **4 fintech clients** including Volt Money and PayU; resolved **30+ high-severity production incidents** and shortened CI/CD cycles by **15%**.
- Overhauled NPCI auto-debit mandate processing, lifting successful collection rates by **12%** through improved retry logic and idempotency controls.
- Eliminated **30%** of recurring production bugs by introducing scheduled health checks and post-deployment monitoring on AWS EC2, RDS, and S3.

SDE Intern | M2P Fintech

March 2023 – June 2023

- Built RESTful microservices for loan onboarding in Spring Boot, supporting modules that processed **1,000+ applications**; raised code reliability by **20%** with JUnit and Mockito test suites.
- Standardized API documentation via Swagger and OpenAPI, cutting frontend integration time by **15%** and streamlining cross-team handoffs.

TECHNICAL SKILLS

- Languages and Frameworks:** Java 17, SQL, C, C++, Spring Boot, Spring Security, Spring Cloud, Hibernate, JPA, AOP, Maven
- Architecture and System Design:** Microservices, Event-Driven Architecture, HLD, LLD, Decentralized Transactions, Idempotency, Scalability, High Availability
- Messaging and Caching:** Apache Kafka, ActiveMQ, Redis
- API and Security:** RESTful APIs, API Gateway, OAuth2, OpenID Connect, JWT
- Cloud and DevOps:** AWS (EC2, S3, RDS), Docker, CI/CD Pipelines, Git, GitHub
- Databases and Observability:** MySQL, Query Optimization, Grafana, Prometheus, Cross-Service Tracing
- AI and Developer Productivity:** Claude Code, GitHub Copilot, Gemini, ChatGPT, Cursor, AI-augmented development, LLM-assisted code generation, Prompt Engineering, Generative AI tooling, zero-manual-coding workflows
- Testing and Tooling:** JUnit, Mockito, Swagger, OpenAPI, Postman, IntelliJ IDEA

EDUCATION

University Visvesvaraya College of Engineering (UVCE), Bengaluru
Bachelor of Technology in Computer Science and Engineering

B.Tech in CS & Engineering
2020 – 2023
